

Skin cancer specialist nurse

At Check4Cancer we provide specialist breast, prostate, skin, lung, bowel and cervical cancer screening services. Our unique services provide access to OneStop clinics for both skin and breast patients who have suspected symptoms of cancer enabling rapid access to treatment.

Due to an expansion of our services, we are currently looking for experienced nurses in skin cancer assessment. You will work autonomously within our clinics and in the corporate environment, seeing and assessing clients' skin lesions using dermoscopy. You will have the time to assess your patients whilst also providing them with education relevant to their needs.

This is a unique and exciting role that will give you the ability to work within a true nurse led service. We are currently looking for nurses to work in the London area but flexibility to travel outside of London is also required.

If you would like further information please contact Louise Mills, Clinical Services Director at louise@check4cancer.com
